

Oregon Program Autism Training Sites and Support

## **Two-Day Virtual Workshops**

### *Implementing Evidence Based Practices in Remote Learning Environments Workshop*

The STAR Online Learning System (SOLS) for primary or secondary and the STAR Media Center will be used to demonstrate the remote learning methods.

**Presented by Oregon Program Autism Training Sites & Support Staff & Oregon Regional Programs**

#### **What/Who:**

Participants will receive virtual training on how to implement asynchronous and synchronous (instructor led) remote learning practices for students with autism and other developmental disabilities. The following evidence-based instructional strategies: teaching functional routines, task analysis, discrete trial training, pivotal response training (primary only) and positive behavior intervention and supports as used in the STAR Online Learning System (SOLS-s). This workshop is appropriate for teachers, assistants, related service providers, specialists and administrators working with either primary (PreK, Elementary) or secondary (Upper Elementary/Middle/High School & Post-Secondary) level students with ASD and other related developmental disabilities.
